Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

- 1. [Currently Amended]A composition comprising:
 - (a) a stabilizer system comprising a pectin compound and an alginate compound wherein the alginate compound has a ratio of mannuronic acid units to guluronic acid units of from about 0.1 to about 0.9; and
 - (b) a cellulose compound.
- 2. [Original] A composition according to Claim 1 further comprising at least one enhancer material selected from the group consisting of vitamins, minerals, oils, and opacifiers.
- 3. [Original]A composition according to Claim 2 wherein the cellulose compound is selected from the group consisting of carboxymethylcellulose, methylcellulose, hydroxyethylcellulose, and hydroxypropylcellulose.
- 4. [Original]A composition according to Claim 3 wherein the cellulose compound is carboxymethylcellulose.
- 5. [Original]A composition according to Claim 4 wherein the pectin compound is a non-amidated pectin.
- 6. [Original]A composition according to Claim 5 wherein the pectin compound is a highly methylated non-amidated pectin.
- 7. [Original]A composition according to Claim 6 wherein at least one enhancer material is selected from the group consisting of ferric pyrophosphate and titanium dioxide.
- 8. [Canceled]
- 9. [Currently Amended] A composition according to Claim § 7 wherein the alginate compound has a ratio of mannuronic acid units to guluronic acid units is from about 0.1 to about 0.5.

Application No. 10/014,980 Amendment Dated February 3, 2004 Reply to Office Action of November 10, 2003

- 10. [Original]A composition according to Claim 9 wherein the ratio of the pectin compound to the alginate compound is from about 0.1 to about 0.9.
- 11. [Original]A composition according to Claim 10 wherein at least one enhancer material is titanium dioxide.
- 12. [Original]A composition according to Claim 10 comprising from about 0.01% to about 0.2% of the pectin compound and the alginate compound, by weight of the composition.
- 13. [Original]A composition according to Claim 12 comprising from about 0.01% to about 0.2% of the cellulose compound, by weight of the composition.
- 14. [Original]A composition according to Claim 13 wherein at least one enhancer material is titanium dioxide.
- 15. [Original]A composition according to Claim 13 wherein at least one enhancer material is ferric pyrophosphate.
- 16. [Original]A composition according to Claim 13 wherein the ratio of the pectin compound to the alginate compound is from about 0.1 to about 0.4.
- 17. [Original] A composition according to Claim 16 wherein the ratio of the pectin compound to the alginate compound is from about 0.2 to about 0.4.
- 18. [Original]A composition according to Claim 17 comprising from about 0.02% to about 0.08% of the pectin compound and the alginate compound, by weight of the composition.
- 19. [Original] A composition according to Claim 18 comprising from about 0.04% to about 0.08% of the pectin compound and the alginate compound, by weight of the composition.
- 20. [Original] A composition according to Claim 19 comprising from about 0.02% to about 0.05% of the carboxymethylcellulose, by weight of the composition.
- 21. [Original]A composition according to Claim 20 wherein at least one enhancer material is titanium dioxide.

Application No. 10/014,980 Amendment Dated February 3, 2004

Reply to Office Action of November 10, 2003

22. [Original]A composition according to Claim 20 wherein at least one enhancer material is

4

ferric pyrophosphate.

23. [Original] A composition according to Claim 13 wherein the ratio of the pectin compound to

the alginate compound is from about 0.4 to about 0.9 and the composition comprises from

about 0.01% to about 0.06% of the pectin compound and the alginate compound, by weight of

the composition.

24. [Original]A composition according to Claim 23 which comprises from about 0.03% to about

0.05% of the pectin compound and the alginate compound, by weight of the composition.

25. [Original]A composition according to Claim 5 which is a beverage composition further

comprising a beverage member selected from the group consisting of water, fruit juice, tea

solids, fruit flavors, botanical flavors, and mixtures thereof.

26. [Original] A composition according to Claim 25 wherein the beverage composition exhibits a

pH of from about 2 to about 5.

27. [Original]A composition according to Claim 26 wherein the beverage composition exhibits a

pH of from about 2.7 to about 3.8.

28. [Original]A method of stabilizing a product comprising incorporating into the product the

composition according to Claim 1.
